

How to Learn Math

Lesson 3: Mistakes and Speed

Name: _____

Date: _____

Period: _____

“Mistakes: New Evidence”

Why is it good to make a mistake in math? Write a complete sentence, please.

“Mistakes and Success in Life”

Choose one of the behaviors we reviewed earlier that are used by successful people in the world and write about the way you could use it in your approach to math.

First choose the behavior you want to write about:

- Go against traditional ideas
- Play with ideas without judging them
- Be open to different experiences
- Keep going through difficulties
- Feel comfortable being wrong
- Try seemingly wild ideas

Now write about how you think you could use it in your approach to math.

“Math and Speed”

What are some important things you learned today about mistakes, struggle, and speed that everyone your age should know? Write a paragraph, please.
